WORK HISTORY

ZITBOARD, India | Founder & Lead Software Engineer

Feb 2026 – Present

- Founded and built ZitBoard, an AI-powered business operating system that unifies sales, hiring, and operational data into a single source of truth, enabling faster and more informed business decisions.
- Architected and shipped a production-grade software platform solo from zero to 100+ active users; applied rigorous software design principles, modular architecture, and system-level performance optimization across the full stack.
- Built and optimized AI inference pipelines using TensorRT-aligned deployment practices; focused on minimizing latency, maximizing throughput, and ensuring model reliability under real-world load.
- Designed automated testing and CI/CD frameworks to enforce code quality, system correctness, and continuous performance monitoring across all production components.

FULLERS SMITH AND TURNER, London, UK | Data Administrator

May 2024 – Dec 2025

- Designed, trained, and deployed ML models in Python/C++ to process and classify 20,000+ daily transactions across 127 business units; applied deep learning techniques and feature engineering to maximize algorithmic accuracy and throughput.
- Engineered PySpark distributed data pipelines processing ~4TB/month; leveraged parallel computing techniques for high-throughput, low-latency data processing at enterprise scale.
- Built anomaly detection algorithms across millions of records using advanced statistical and ML methods; performed in-depth analysis and root cause identification to surface ~\$10,000+ in quarterly loss avoidance.
- Communicated complex algorithmic findings and model performance analysis directly to business stakeholders, translating technical depth into actionable decisions.

DEEPSTORY, India | ML Engineer

Jun 2022 – Sep 2022

- Optimised reinforcement learning models by ~20% through systematic architecture tuning, hyperparameter analysis, and performance profiling of ML algorithms on cloud infrastructure.
- Contributed to software design reviews, code refactoring, and algorithmic performance optimisation across production ML systems.

TECHNICAL SKILLS

Languages C/C++, Python, Java, SQL, TypeScript

Deep Learning & AI TensorRT (GPU Inference Optimization), TensorFlow, CNNs, Reinforcement Learning, Deep Learning, Hugging Face, LangChain, LangGraph, RAG, Generative AI

Performance & Systems AI Algorithm Optimization, Performance Analysis & Profiling, Distributed & Parallel Computing, Software Design, MLOps, CI/CD, Docker, Kubernetes, Linux

Data & Analytics PySpark (Apache Spark), ETL Pipelines, BigQuery, MySQL, Kafka, Data Analytics, Statistical Modeling, Feature Engineering

Cloud & Infrastructure AWS, Azure, GCP, REST APIs, Git

Soft Skills Customer-facing Technical Communication, Cross-functional Collaboration, Problem-Solving, Agile/SDLC

EDUCATION

MSc – Artificial Intelligence

Queen Mary University of London

Sep 2022 – Sep 2023

B.Tech – Computer Science

(Cyber Security & Digital Forensics)

Vellore Institute of Technology

Jul 2018 – Jul 2022

PROJECTS

- **Cyber.AI:** RL-based AI agents for automated exploit detection; end-to-end ML algorithm pipelines with deep focus on performance, data quality, and interpretability.
- **HyVuln:** High-throughput ML engine processing 10,000+ patterns at 92% accuracy; core focus on algorithm optimization, pattern-matching performance, and ML classification efficiency.
- **Morse Code Detector:** CNN-based deep learning model for temporal signal classification; architecture design, training optimization, and performance evaluation.
- **RedI (Intelligent Eye):** On-device visual AI application running full ML inference locally; engineered for minimal latency and zero data-transmission overhead.

CERTIFICATIONS

- Google AI Professional (Coursera)
- Claude 101 – Anthropic
- AI Fluency Framework & Foundations – Anthropic
- Generative AI Bootcamp
- Automation AI Accelerator: Co-pilot to Autonomous Agent
- The One Million Prompters – Dubai Future Foundation
- Vibe Coding L2: Silver (Lovable)
- Kubernetes Certified App Developer
- JPMorgan Chase Quantitative Research
- Goldman Sachs SE Job Simulation
- Data Science in Real-world Projects
- Google Data Analyst Certificate
- Google Business Intelligence Certificate
- Accenture Data Analytics & Visualisation
- Software Engineer Certificate - HackerRank
- SQL(Advanced) Certification - HackerRank
- Tata - GenAI Powered Data Analytics
