sparshv48@gmail.com | +91 84548 44419 | Dubai, UAE (Available Locally) | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

AI and Automation Engineer with 3+ years of experience analyzing business processes, designing technical specifications, and operationalizing production-grade machine learning models, AI algorithms, and automated workflows. Proven track record identifying high-impact operational bottlenecks, managing large-scale data pre-processing and data integrity across terabyte-scale distributed pipelines (~4 TB/month), and deploying secure enterprise integrations across Azure and AWS. Deep expertise in Python, SQL, RESTful API orchestration, Responsible AI principles, and automated validation frameworks. Holds an MSc in Artificial Intelligence from Queen Mary University of London and a B.Tech in Computer Science. Currently in Dubai on a visit visa with full readiness for immediate local onboarding and visa transition.

## TECHNICAL SKILLS

**AI, ML & Automation:** AI Algorithms, Machine Learning Models, Automation Scripts, Workflow Automation, RPA Concepts, Lang-Graph, Multi-Agent Workflows, RAG, Prompt Engineering, Model Testing & Validation

**Programming & Frameworks:** Python (FastAPI, Scikit-learn, Pandas, PyTorch), R, Java, SQL (PostgreSQL, MySQL), TypeScript, Node.js, C/C++, Bash, RESTful APIs, Webhooks

**Data Engineering & Pre-Processing:** Data Assessment, Cleaning & Feature Preparation, Data Quality & Integrity, PySpark (Apache Spark), ETL/ELT Pipelines, Hadoop, Vector Databases (pgvector, FAISS), Statistical Modeling

**Systems, Cloud & Governance:** Microsoft Azure, AWS, Docker, Kubernetes (CKAD), Linux, CI/CD, Git/GitHub, Continuous Performance Monitoring, System Observability, Data Privacy & Responsible AI Governance

**Stakeholder Delivery:** Technical Architecture Specifications, Feasibility & Impact Assessment, Cross-Functional Collaboration, End-User Training, Agile/SDLC

## WORK EXPERIENCE

### ZitBoard

Remote, India

Founder & Lead AI Automation Engineer

Feb 2026 – Present

- Conducted in-depth business process analyses to identify high-ROI automation opportunities, architecting technical specifications and AI-driven workflows tailored to commercial objectives.
- Developed and deployed custom machine learning models and Python/FastAPI automation services to deliver real-time predictive scoring, pipeline velocity tracking, and automated task dispatch.
- Managed data pre-processing, feature cleaning, and validation pipelines, integrating diverse CRM and enterprise platforms (Salesforce, HubSpot) to guarantee data quality and schema integrity.
- Established continuous monitoring mechanisms, telemetry dashboards, and automated validation tests to measure solution accuracy, uptime, and business value realization.
- Designed multi-tenant microservices on Azure Container Apps using Bicep for Infrastructure as Code (IaC) and Supabase/PostgreSQL for secure database isolation.
- Authored end-user documentation and conducted training sessions for cross-functional teams, driving rapid adoption and ensuring adherence to data privacy regulations.

### Fullers Smith and Turner

London, UK

AI & Automation Systems Specialist / Data Analyst

May 2024 – Dec 2025

- Analyzed operational processes across 127 business units to evaluate automation feasibility and translate operational requirements into scalable digital capabilities.
- Engineered automated Python scripts and ML anomaly detection algorithms monitoring 20,000+ daily transactions, delivering \$10,000+ in quarterly cost avoidance.
- Managed and pre-processed enterprise transactional data using distributed PySpark pipelines (~4 TB/month) with automated schema validation and quality controls.
- Enforced compliance with data privacy regulations, role-based access controls, and security standards across all automated data-processing systems.
- Collaborated with IT, business analysts, and operational teams to report automation milestones, demonstrate tangible ROI, and refine business workflows.

### DeepStory

India

Machine Learning & Automation Intern

Jul 2022 – Sep 2022

- Developed Python automation routines, data cleaning scripts, and ML microservices hosted on AWS cloud infrastructure.
- Conducted model validation and performance profiling to ensure output accuracy, reliability, and adherence to technical requirements prior to deployment.
- Participated in cross-functional code reviews, unit testing, and algorithmic refactoring for client-facing analytical modules.

## KEY PROJECTS

- Enterprise AI Automation Engine:** End-to-end automated platform integrating CRM data streams, automated Python ML models, and interactive KPI dashboards with sub-second data synchronization.
- Automated Anomaly Detection System:** PySpark data pre-processing and statistical anomaly detection pipeline validating 20,000+ daily operational records with automated failure alerting.

- **Responsible AI Validation Suite:** Automated testing framework verifying model accuracy, schema boundaries, and data privacy safeguards across live APIs and machine learning models.
- **RedI (Intelligent Automation):** Privacy-first edge application featuring local automated inference with zero external data transmission, optimized for data minimization and security.

## EDUCATION

---

### Queen Mary University of London

London, UK

#### Master of Science (MSc) in Artificial Intelligence

Sep 2022 – Sep 2023

- Focus: Deep Learning, Neural Networks, Machine Learning Systems, Computer Vision, and Applied AI Architecture.

### Vellore Institute of Technology

Vellore, India

#### Bachelor of Technology (B.Tech) in Computer Science

Jul 2018 – Jul 2022

- Specialization in Cyber Security & Digital Forensics; core coursework in Data Structures, Algorithms, Databases, and Systems Security.

## CERTIFICATIONS

---

- Google AI Professional (Coursera)
- Claude 101 – Anthropic
- AI Fluency Framework & Foundations – Anthropic
- Generative AI Bootcamp
- Automation AI Accelerator: Co-pilot to Autonomous Agent
- The One Million Prompts – Dubai Future Foundation
- Vibe Coding L2: Silver (Lovable)
- Kubernetes Certified App Developer
- JPMorgan Chase Quantitative Research
- Goldman Sachs SE Job Simulation
- Data Science in Real-world Projects
- Google Data Analyst Certificate
- Google Business Intelligence Certificate
- Accenture Data Analytics & Visualisation
- Software Engineer Certificate - HackerRank
- SQL(Advanced) Certification - HackerRank
- Tata - GenAI Powered Data Analytics
